

# (ROTATING) PUSHING FORK

Taylor-made and reliable: our (rotating) pushing forks are ideal for transferring loads in the production line, the frontal picking of goods or the loading and unloading of tigger trains, for single-deep or multiple-deep storage.

## PRODUCT FEATURES

- Suitable for CHEP-pallets, laterally stored EURO-pallets, coils and rolls
- For loads up to 15 t
- Angle rate up to 270 degrees
- Available with lift device or fork adjustment
- Available as overhead unit (suspended)

## CUSTOMER BENEFITS

- Individually adjustable to different load units and application purposes
- Solid design ensures extreme reliability
- Guaranteed availability of spare parts for the product's entire lifecycle
- Low maintenance costs
- Modular design (can be used in combination with AFB's transfer car, eccentric lifting devices and tilting units)
