

ECCENTRIC LIFTING DEVICE

Moment load resilient and precise: the eccentric lifting device can be used for lateral product lines, for feeding machines, for corner transfers or level adjustment in conveyor sections.

PRODUCT FEATURES

- Suitable for lifting heights up to 900 mm
- Suitable for loads up to 7 t
- Modular design (can be used in combination with other AFB products)
- Optimal integration into conveyor sections
- Available as chain- or belt-driven, single or double shaft unit, with or without load handling device
- Upon request available as grid or inverter operated unit (for intermediate heights)

CUSTOMER BENEFITS

- Solid design ensures extreme reliability
- Guaranteed availability of spare parts for the product's entire lifecycle
- Low maintenance costs
- Can be used in combination with other AFB products
